

PRP for Hair Loss

Platelet-Rich Plasma (PRP) injections can treat various types of hair loss. PRP is a highly concentrated serum (rich in growth factors), which stimulates new hair growth, thickens hair, and increases the overall health of the scalp.

Botox®/Dysport®

Neuromodulators help relax targeted facial muscles, which reduces wrinkles, frown lines, and softens facial expressions. Recommended every 3-4 months.

Injectable Fillers (HA fillers)

Dermal fillers provide fullness and volume to the skin, minimize facial wrinkles and folds, and can alter contours. Fillers can last 6-12 months depending on the location and product used.

Sculptra®

Sculptra® is an injectable treatment that works to replace lost collagen, giving you a more natural-looking appearance over time.

Kybella®

Kybella® is an injectable medication used to improve the appearance of moderate to severe fat below the chin; also referred to as a “double-chin.”

Sclerotherapy

Sclerotherapy uses a fine needle and medication to improve the appearance of spider veins in the legs.

Our mission is
simple, it's YOU!

Perimeter Dermatology, a Forefront Dermatology practice, is committed to offering quality professional dermatological services and skincare. Our highly skilled and educated providers take the time to understand your concerns and goals before customizing a comprehensive treatment plan.

Perimeter Dermatology is a full-service practice that encompasses an array of cosmetic services, including advanced laser technology, the latest skin peels, cosmetic injectables, and fillers.

Perimeter Dermatology

5505 Peachtree Dunwoody Road

Facial

Starting at **\$150**

Our medical-grade facial treatments are customized depending on the individual needs of your skin. This service may include cleansing, exfoliation, dermaplaning, and skin-specific treatments to help reach your skin goals.

Diamond Glow™ Facial

Starting at **\$200**

Diamond Glow™ (previously known as SilkPeel) is an advanced 3-in-1 skin-resurfacing treatment. This treatment improves skin health, function, and appearance by combining exfoliation, extraction, and infusion of condition-specific serums. This facial is designed to hydrate and plump the skin—a great treatment right before a big event!

Chemical Peels

Superficial Peels—Starting at **\$85**

Medium-Depth Peels—Starting at **\$250**

A chemical peel treatment uses a solution to exfoliate layers of your skin to improve overall tone, texture, acne, and various types of hyperpigmentation, leaving you with an amazing glow. We have peels for all skin types—even those with sensitive skin.

Microneedling (SkinPen®)

Starting at **\$300**

SkinPen® is the first microneedling (Collagen-Induction Therapy) device cleared by the FDA. It is clinically proven to safely and effectively treat facial acne scars. It can also improve skin laxity, tone, and texture.

Microneedling with PRP

Starting at **\$600**

Microneedling with PRP (Platelet-Rich Plasma) has been shown in studies to improve outcomes and decrease downtime by infusing your own plasma during the treatment.

Vbeam

Starting at **\$95**

Vbeam is a pulsed dye laser (PDL) that treats vascular conditions such as rosacea, broken capillaries, port wine stains, hemangiomas, red moles, and hyperpigmentation.

Alexandrite Laser

Starting at **\$95**

The “Alex” laser emits focused light energy via an alexandrite crystal. As the light passes through the crystal, a beam of light is produced. This light selectively targets pigmented areas with light, causing them to break up and fade away.

PicoWay® Laser

Starting at **\$95**

This laser targets the unwanted pigment in ultrashort picosecond pulses. These pulses shatter the pigment into very tiny particles, which are then flushed by the body's natural processes. The PicoWay® Laser emits less heat energy than traditional lasers, so it is also safe on some darker skin tones.

Syneron® eMax SRA

Starting at **\$300** | 2–4 sessions

This treatment is similar to the, commonly known, “photo facial”—but better! eMax SRA is powered by Syneron's exclusive ELOS™ technology, which uses combined bipolar radiofrequency and Intense Pulsed Light (IPL) to effectively treat benign pigmented and vascular lesions, as well as mild textural imperfections with minimal downtime.

PicoToning

Starting at **\$275** | 4+ sessions

PicoResolve® is a non-surgical, fractional procedure that utilizes laser light in ultra-short pulses (picoseconds) to target skin irregularities, pigmentation, acne scars, and signs of aging with minimal to no downtime.

GentleYAG®

Starting at **\$275** | 4+ sessions

GentleYAG® is a laser treatment that heats the deeper layers of skin, promoting the production of new collagen. Collagen is the primary connective protein in the human body and helps retain moisture to keep your skin smooth, plump, and firm with little to no downtime.

Matrix IR™

Starting at **\$275** | 4+ sessions

The Matrix IR™ fractional applicator combines Fractional Optical Energy with Bi-Polar Radio Frequency (RF) to produce deep dermal heating to effectively treat fine to moderate wrinkles in the lower face and neck with little to no downtime.

Laser Hair Removal

Prices vary depending on area | 8–12 sessions

With access to both Alexandrite (755nm) and YAG (1064nm) wavelengths, we can treat all skin types for hair removal without damaging the skin.

Tattoo Removal

Starting at **\$99** | prices vary by size

PicoWay® is a high power laser with ultra-short pulses that shatters tattoo ink while leaving outer layers of the skin intact. This laser can treat a wide range of tattoo colors across a broad range of skin types. Over a series of treatments, PicoWay® can eliminate most tattoos.

Electrodesiccation (Hyfrecation)

1 lesion **\$75** | 2–4 lesions **\$125** | 5–9 lesions **\$175** | 10–14 lesions **\$225** | Each additional 10 lesions **\$100**

Using light hyfrecation, we can remove a variety of different skin lesions such as skin tags, seborrheic keratosis, and sebaceous hyperplasias. For optimal results, more than one treatment may be required.
